Why GOAL? Caring, Supportive, and Personalized Education.

GOAL High School serves such an important role in providing high school students with a unique educational choice. GOAL's approach goes far beyond what is offered in a traditional brick and mortar school building. In addition to a strong academic program that focuses on the necessary skills to become productive members of society, GOAL provides the social-emotional services and supports that help our students in all facets of their lives. We strive to create a safe and welcoming high school experience where students feel valued and respected for who they are.

GOAL serves students in grades 9 through 12 and up through the age of 21. Since 2009, the school has positively impacted communities across Colorado by decreasing dropout rates and increasing graduation rates. Our school features highly qualified teachers and a robust special education department with the expertise to meet individual student needs. Students graduate from GOAL High School ready to continue their education, enter the workforce, or serve their country in the military.

GOAL is the largest public high school in Colorado. Staff members reside in the local communities they serve and range from licensed teachers, principals and assistant principals, academic coaches, school counselors and counseling assistants, social workers and administrative assistants, all working on behalf of student success. We have a very talented and extremely creative Instructional Technology staff who handle our electronic communication and delivery of instructional materials for the entire state.

Although curriculum is offered online, GOAL offers students the option of attending drop-in centers to work on their studies, or to receive support, tutoring and direct instruction. This blended model offers a high degree of flexibility to students in all situations. Transportation to the centers is provided along with food and other essential needs.

GOAL High School is constantly working to build partnerships and enhance the capacity to sustain a robust talent pipeline in the local communities we serve. Both a strong public K-12 and higher education program need to be in place for this to happen. Industry-led talent identification and training programs, including job shadowing, internships, and apprenticeship programs are offered as well. GOAL has articulation agreements with colleges and universities across the state, ensuring that our students have the opportunity to begin their college course work and/or pursue a workforce credential while finishing the requirements for their high school diploma. GOAL covers the costs of tuition, books, and fees. In addition, our Career and Technical Education Program continues to grow in numbers and in diversity of career choices. Plans for 2021-2022 include the expansion of our Career and Technical Education opportunities through partnerships with local businesses to provide our students with entry level jobs to build their skills through on-the-job training.

It is an exciting time for our students and staff at GOAL High School. As challenging as the Pandemic has been, it caused us all to renew our commitment to innovation and creativity. Regardless of circumstances, we are committed to the very important job of educating our students and helping them stay on track to graduate from high school. I encourage you to contact us with any questions.

We look forward to working with communities across the state of Colorado to ensure the success of our students.
